EXPRESS DECOR MATCH SYSTEM

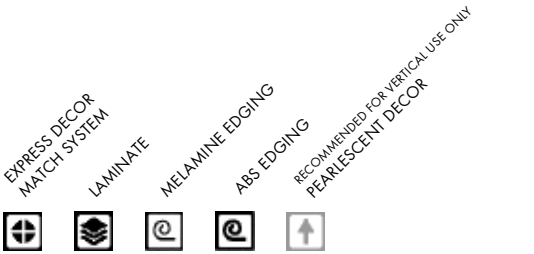

The Express Decor Match System is a collection of decors available from UK stock in a variety of materials.

As each decor is available in each of the materials (shown to the left), you can ensure that the most appropriate material is used without having to compromise colour continuity.

This opens up the possibility for Value Engineering. Often used only to reduce project costs, Value Engineering also:

- Eliminates over specification
- Ensures materials are fit for purpose
- Facilitates colour continuity

For further information please check availability list.
